

Synpunkter på förslag till havsplan för Tysklands ekonomiska zon

The National Board of Housing, Building and Planning has taken part of the draft of Maritime Spatial Plan of Germany. Our overall comment is that the draft is elaborate and clear. We have a suggestion for the map.

In the vision one of the guiding principles is:

”Consideration of land-sea relationships and transport and value chains by closely working with the coastal federal states for coherent planning,”

Our suggestion is that the map also contained an illustration that shows the fairway’s connection to land. This would make it easier to comprehend the importance and impact of the infrastructure for a coherent planning.
